

Dear Admissions Committee,

My name is Temuulen and I am a sophomore student applying to Asia University, Taiwan. I am extremely excited about continuing my education journey and being able to potentially do so at Asia University.

As a sophomore, I have established solid groundwork in finance, and I want to expand my knowledge in a supportive and exciting atmosphere. I want to pursue my studies at Asia University, Taiwan in part due to its affordable tuition fees, and the quality of education I would receive in Taiwan. Taiwan has a great reputation for academic excellence along with a vibrant and safe environment. These characteristics of Taiwan will make it an ideal place for me to study. Asia University also has a fantastic curriculum and professors which would align perfectly with me excelling academically and entering the workforce successfully.

Basketball is a huge part of my life, and I love it for the discipline and teamwork skills it gives me. I am looking forward to joining the basketball team, or a recreational sport at Asia University and staying active and connecting with fellow classmates. I have learned to balance studying and sports and will use those same time management skills to achieve academic success at your university.

To succeed at Asia University, I have developed a study plan. I will schedule my classes and lectures in advance. Based on my course requirements, I will create a weekly schedule to allot time for attending classes, reflecting on class notes, and completing assignments. I will find out early in the semester how much time is recommended for studying and plan accordingly. I hope to achieve at least a 3.5 GPA by attending all class lectures to learn, seeking assistance when needed from my professors, providing opportunities for casual discussion, (if they have office hours), and participating in class discussions. I plan to take advantage of all the resources on campus including the library and students available for study groups. I want to improve my Chinese language skills and will engage in the community and take a language course, if possible, to assist with assimilating into Taiwanese culture and society.

I am also excited to be a contributor to the dynamic community at Asia University. I enjoy being part of activities, events, and cultural experiences and to share my enthusiasm for contributing back to support and learning from the diversity of students. I am inspired by Taiwan's rich culture and gorgeous natural scenery, and I hope to be able to experience both it while working hard on my studies.

I selected Asia University not only because it is very affordable but also because of its commitment to cultivating global talent. I am confident that being a student at your institution will provide me with many of the skills and experiences that I need to achieve my long-term career aspirations. Thank you for considering my application, and I look forward to the opportunity to develop academically and personally at Asia University.

Sincerely,

Temuulen Sukhbat
